MANISH TALUKA

Full-Stack Developer (MERN) | Software Engineering Student

Hyderabad, India | manishtaluka413@gmail.com | +91 9652011162

LinkedIn | GitHub | LeetCode | Portfolio

PROFESSIONAL SUMMARY

Full-stack developer who has independently designed and shipped 3+ production-grade MERN applications featuring JWT/OAuth authentication, payment integrations (Razorpay), third-party API consumption, and admin/vendor/customer role-based dashboards. Solved 600+ DSA problems (LeetCode, CodeChef, HackerRank, GeeksforGeeks); IT undergraduate with a strong foundation in DSA, OOP, DBMS, and computer networks.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript (ES6+), Python, SQL (MySQL)
- **Frontend:** React.js, Redux Toolkit, Vite, Tailwind CSS, Bootstrap, Responsive Web Design
- **Backend & Databases:** Node.js, Express.js, REST API design, MongoDB, MySQL, JWT & OAuth 2.0
- **Integrations:** Razorpay Payments, Cloudinary, Resend (email/OTP), third-party REST APIs (CricAPI)
- **Tools & Platforms:** Git, GitHub, Postman, Vercel, Render, VS Code
- **Coursework:** Data Structures & Algorithms, OOP, Computer Networks, Operating Systems, DBMS

PROJECTS

RentWheels — Full-Stack Car Rental Platform Live Demo | GitHub Repo

- Built a MERN car rental platform with distinct Customer, Vendor, and Admin dashboards, backed by **15+ REST APIs** for auth, vehicle management, and bookings
- Implemented JWT access/refresh token authentication plus Google OAuth, with role-based authorization across 3 user types
- Integrated Razorpay payments with signature verification, and Cloudinary image uploads via Multer memory storage
- Built OTP-based forgot-password flow using Resend after diagnosing SMTP port restrictions on the hosting platform's free tier

RCB Fan Hub — MERN Sports Fan Platform Live Demo | GitHub Repo

- Converted a static HTML/CSS/Bootstrap fan site into a full MERN application, adding JWT authentication and a complete admin panel
- Built a merchandise store with Razorpay checkout, and a news/blog CMS supporting Cloudinary-backed media uploads
- Implemented live cricket score updates via scheduled polling of the CricAPI third-party sports API
- Built the frontend with React, Vite, Redux Toolkit, and Tailwind CSS, delivered as a complete, self-contained deployable package

Remote Interview Platform Live Demo | GitHub Repo

- Built a full-stack remote interview platform with integrated video calling, real-time chat, and a collaborative coding environment
- Implemented secure authentication and interview-scheduling workflows to streamline technical candidate evaluation
- Developed a responsive React frontend and scalable Node.js/Express backend, with MongoDB storing user profiles, interview records, and chat logs

Expense Tracker — Java Spring Boot GitHub Repo

- Engineered a Spring Boot backend with RESTful APIs for expense CRUD, category management, and reporting
- Implemented JWT authentication and role-based access control via Spring Security for secure multi-user use
- Designed and optimized a MySQL schema with Hibernate/JPA for efficient expense categorization and retrieval

EDUCATION

- **B.Tech, Information Technology** — MLR Institute of Technology | 2023 – 2027 | CGPA: 8.92/10
- **Class XII** — TS Model School & Jr College (TSBIE) | 2021 – 2023 | 96.9%
- **Class X** — TS Model School & Jr College (SSC) | 2020 – 2021 | 100%

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL — Programming in Java: Elite + Top 2% Nationwide (April 2025)
- Salesforce — Certified Platform Developer (August 2026)
- Cisco — HTML, CSS, and JavaScript Essentials
- Solved 600+ DSA problems in Java across LeetCode, CodeChef, HackerRank, and GeeksforGeeks
