

MANISH TALUKA

Software Engineering Student | SDE Intern Candidate

manishtaluka413@email.com | +91 9652011162 | Hyderabad

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Information Technology student skilled in Java, DSA, MERN Stack, REST APIs, MongoDB, and full-stack web development. Solved 600+ DSA problems across LeetCode, CodeChef, and HackerRank.

TECHNICAL SKILLS

Languages : Java, JavaScript (ES6+), Python, SQL (MySQL)

Frontend : React.js, Bootstrap, Responsive Web Design

Backend & DB : Node.js, Express.js, MongoDB

Tools & Platforms : Git, GitHub, VS Code, Postman

Courses : Data Structures & Algorithms, OOPs, Computer Networks, Operating Systems, DBMS .

Problem Solving : 600+ DSA problems solved | LeetCode, CodeChef, HackerRank, GeeksforGeeks

EDUCATION

2023-2027	B.Tech in Information Technology at MLR Institute of Technology	(CGPA: 8.92/10)
2021-2023	Class 12th at TS Model school & Jr college (TSBIE)	(96.9%)
2020-2021	Class 10th at TS Model school & Jr college (SSC)	(100%)

PROJECTS

Rent Wheels:

[live demo](#) | [GitHub Repository](#)

- Developed a MERN-based car rental platform with Customer, Vendor, and Admin dashboards.
- Implemented 15+ REST APIs for authentication, vehicle management, and booking operations.
- Designed JWT-based role authentication and authorization for 3 user types.
- Integrated MongoDB for data persistence and secure session management.
- Built responsive React.js interfaces for car browsing, booking, and rental tracking.

Remote Interview Platform :

[live demo](#) | [GitHub Repository](#)

- Built a full-stack remote interview platform with integrated video calling and real-time chat to streamline technical hiring.
- Implemented secure authentication, interview scheduling, and collaborative coding environment for seamless candidate evaluation.
- Developed responsive frontend with React and scalable backend services using Node.js and Express.
- Managed persistent data with MongoDB, ensuring reliable storage of user profiles, interview records, and communication logs.

Expense Tracker – Java Spring Boot

[GitHub Repository](#)

- Engineered a **Spring Boot–based backend** with RESTful APIs for expense CRUD operations, category management, and reporting.
- Implemented **JWT authentication and role-based access control** using Spring Security to ensure secure multi-user functionality.
- Designed and optimized **MySQL database schema** with Hibernate/JPA for efficient expense categorization and retrieval.

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL — Programming in Java | Elite + Top 2% Nationwide | April 2025
- Solved 600+ DSA problems using Java across LeetCode, CodeChef, HackerRank, and GeeksforGeeks — demonstrating strong analytical and problem-solving skills
